

MDM-100, MDM-100B

Multi-Density Pressure Reduction Mattress Replacement

- **Advanced pressure redistribution**
- **Multiple layers of high specification foam**
- **Comfortable four-way stretch, low shear, low friction cover**
- **Durable vinyl base**
- **Fire barrier sleeve meets CFR16 Part 1633 fire code**
- **Available with built-in perimeter bolsters (MDM-100B)**

The MDM-100 is constructed from layers of high specification foam to provide advanced pressure redistribution. The patient surface is covered by a soft comfortable four-way stretch cover that enhances its pressure redistribution capabilities. The surface is also low shear, low friction and moisture resistant, The vinyl base is extremely durable and easy to clean. The MDM-100 and MDM-100B are manufactured with a fire retardant sleeve that meets the new CFR16, 1633 fire code.
