

# TITAN RS

## *Bariatric Recovery/ Surgery Bed*

MADE IN THE U. S. A.  
HUFFMAN, TEXAS

- The Titan R/S is the perfect rehab bed for bariatric patients needing foot egress to transfer to and from bed
- Fully electric the TITAN RS can drop the foot end of the bed to the floor for easy entry and exit
- Three position drop down side rails
- Full electric the R/S can provide Trendelenberg, reverse Trendelenberg, high-low and cardio positions
- In-bed scales provide accurate weight
- Optional overhead trapeze

The TITAN RS Recovery bed is designed to facilitate ease of entry and exit for the bariatric patient. The foot of the TITAN RS drops to the floor allowing for the patient to stand and walk from the end of the bed. Sturdy handles attached to the foot of the bed assist the patient in standing. While being used as a bed the TITAN SC has all the functions of our other TITAN beds including Trendelenberg, reverse Trendelenberg, and cardio positions. Three position drop down side rails ease patient care. Battery back-up allows the RS to be fully functional anywhere in the facility.
