

TITAN SC800

Bariatric Stretcher Chair

- Touch of a button chair to stretcher control
- Brake/Steer 6' casters for ease of movement throughout the facility
- Operates on battery for full function anywhere the patient goes
- Comfortable upholstered patient surface
- Weight capacity - 800 lb.

The TITAN SC800 Transfer Chair is designed to allow care givers to transfer a non or limited ambulatory patient safely and easily. This unique product performs both stretcher and chair functions. The chair easily allows caregivers to transfer a patient from almost any hospital bed, stretcher, or procedure table to reduce the risk of injury to patient and care giver. The TITAN SC800 operates on battery power and its functions are fully available away from a power supply.
