

# TITAN LB600

## Full Function Low Bed

The TITAN LB is a full electric hi-low bed for the patient at risk of falls. The bed deck when fully lowered is just 7" from the floor. The TITAN LB can raise the bed deck to 30" high to facilitate patient care and reduce risk to the caregiver. Full bed functions including Trendelenberg, reverse Trendelenberg and cardio positions are available. Battery back-up provides full function in power interruptions. The TITAN LC can be provided with bolstered pressure reduction mattress and optional floor pads. Other accessories include overhead trapeze and true low air loss system with air bolsters.

- Full electric operation allows the bed deck to raise and lower from 30" to 7" from the floor
- Full articulation including Trendelenberg, reverse Trendelenberg and cardio
- Battery back-up enables full articulation even in power interruptions
- Accessories include bolstered foam pressure reduction mattress, true low air loss system with air bolsters, floor pads
- 600 lb capacity
